PROFESSIONAL SUMMARY

Full Stack AI Developer building intelligent web applications and AI-driven automation systems with FastAPI, Next.js, TypeScript, and LangChain/LangGraph. Designs REST APIs, browser automation pipelines, retrieval-augmented generation systems, and LLM integrations that connect Python and Node back ends with modern front ends. Combines SQL, NoSQL, Docker, and AWS to support scalable application development.

SKILLS

Machine Learning • Python Programming • LLM/AI Integration in Web Apps • PyTorch • FastAPI and Express.js • LangChain / LangGraph • JavaScript/TypeScript • Next.js • Browser Automation (Browserbase, Trigger.dev) • C++ • Git/GitHub • Docker • AWS • SQL & NoSQL Databases

EXPERIENCE

Full Stack Developer — AITECHGEN Technologies (Remote Internship) *Aug 2026 – Sep 2026*

- Built Platigo, an AI-powered browser automation tool, using TypeScript, Trigger.dev, Browserbase, and Liveblocks for real-time collaborative automation workflows.
- Integrated AI-driven decision-making into automation pipelines to control browser sessions and execute multi-step web tasks autonomously.
- Implemented real-time collaboration with Liveblocks, enabling multiple users to monitor and interact with live automation sessions simultaneously.

TOP PROJECTS

Platigo — plati-go.vercel.app
AI-powered browser automation tool enabling multi-step, autonomous web task execution with real-time collaborative control. Built with TypeScript, Trigger.dev, Browserbase, and Liveblocks.

Cliptic Engine — cliptic-navy.vercel.app
AI-powered platform that converts long-form videos into short clips, generates captions, and enables automatic scheduling across 8+ social media platforms from a single dashboard. Built with Next.js, Gemini API, and AWS.

EzzHire — ezzhire.vercel.app
AI voice interview platform featuring real-time interview feedback, Vapi voice agents, and secure payment integration with Razorpay. Built with Next.js, Vapi SDK, and Razorpay.

WhyAI Resume Craft — github.com/illuzzzio/WHYAIRESUME_CRAFT
Python-based resume builder that generates professional resumes in minutes through automated document generation and formatting.

YT Summarize Chain — github.com/illuzzzio/yt_sumarize_chain
Summarizes YouTube videos, extracts keywords, and generates questions from video content using LLM-powered workflows built with FastAPI, LangChain, and LangGraph.

LogS Solubility Prediction — github.com/illuzzzio/log_Solubility_logS_Prediction
Machine learning model for predicting compound LogS (aqueous solubility) using molecular descriptors and supervised learning with Python, Scikit-learn, and Pandas.

EDUCATION

Bachelor of Technology, Computer Science with AI/ML — Vellore Institute of Technology, Chennai (Expected 08/2028)

CERTIFICATIONS

- Faculty Development Program on SASAI (Sustainable AI, Agentic AI & Systems AI) — Research Scholar (nominated by faculty advisor, VIT Chennai) — NIT Warangal, MeitY, Govt. of India (Jul 2026). View Certificate
- Full Stack Developer Internship Completion Certificate — AITECHGEN Technologies (Aug–Sep 2026). View Certificate
